Fork and Share

03/20/2025

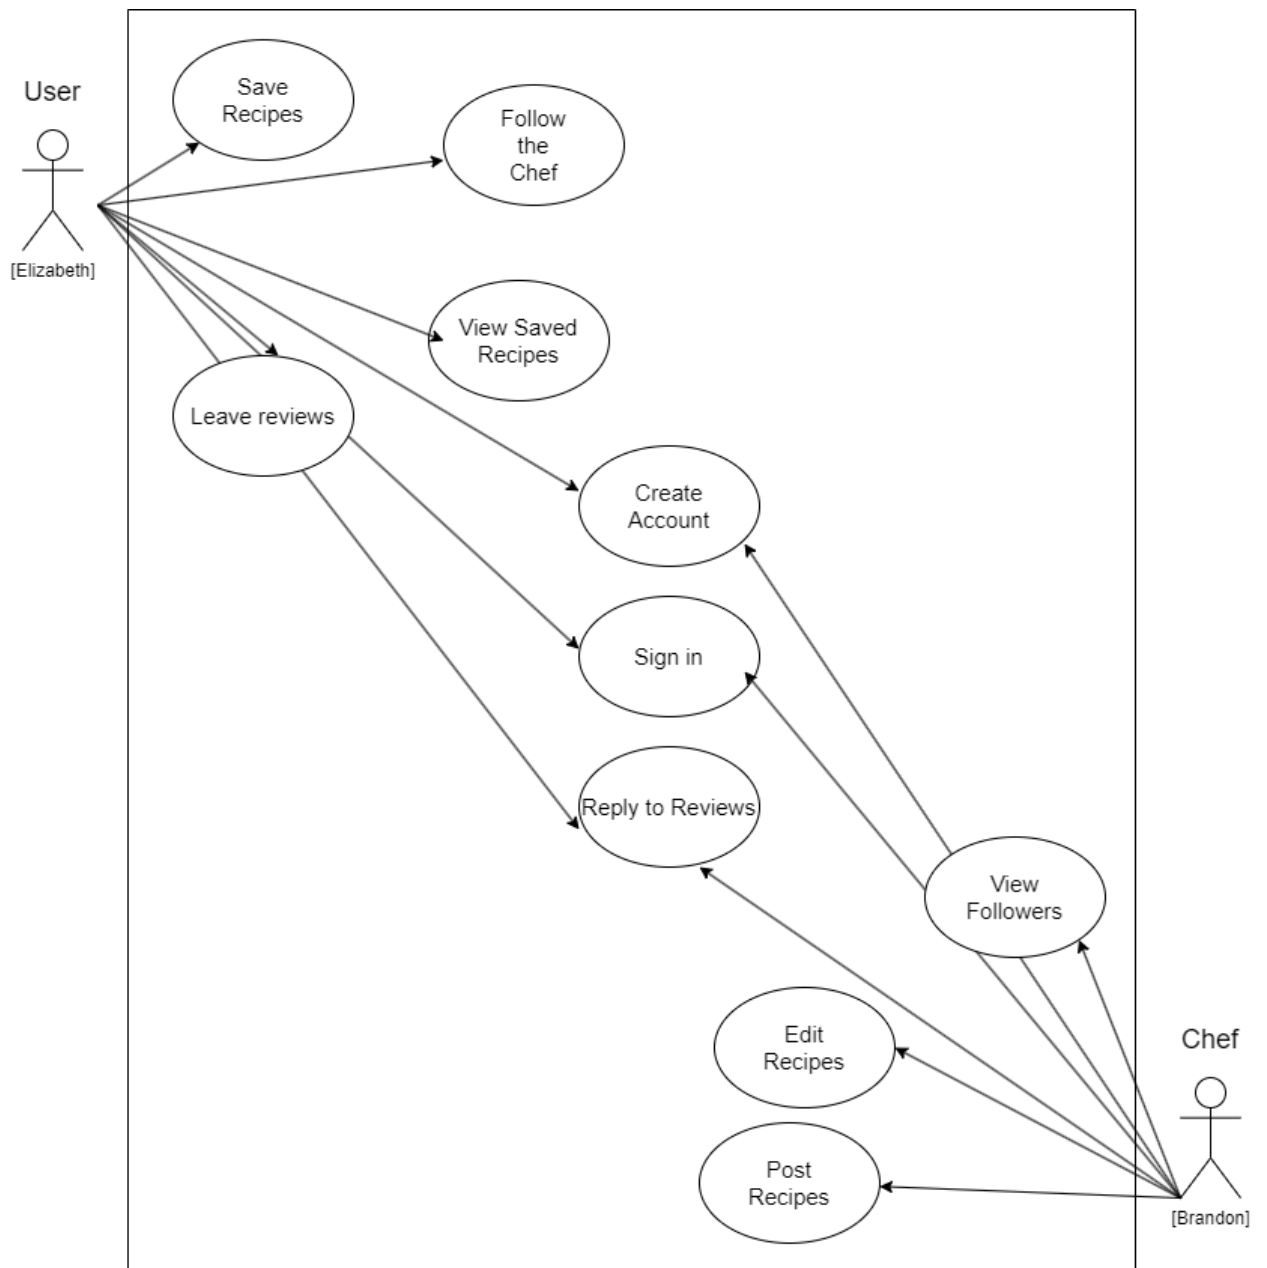

Version 1

Brandon Vazquez, Elizabeth Spratt

1. Project Overview

The goal of the “Fork and Share” web application is to connect users to a wide variety of recipes by allowing them to like, save, and review recipes. In “Fork and Share” our content creators are Chefs who are able to upload their recipes. Chefs are also able to edit recipes after they’ve been posted. Chefs can also manage engagement by replying to comments and tracking the number of followers they have. Users are able to interact by saving recipes by clicking on a “save recipe” button, they are also able to see their saved recipes on their account page. Users can also leave reviews and reply to reviews. Users are also able to follow Chefs by clicking on a “follow” button.
